Claim 5 as amended is no longer generic but is now drawn to a nonelected embodiment (see restriction and election dated 3/9/2007). Thus, claim 5 and its dependents (6 and 11-16) are withdrawn from consideration as being drawn to a nonelected embodiment.

Further, newly submitted claims 17-21 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The newly submitted claims are related to the originally filed claims in a product/process of use relationship. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used for another and materially different process, such as in a heat exchanger for heating liquids, gases, or other objects besides towels.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 17-21 are

withdrawn from consideration as being directed to a non-elected invention.
See 37 CFR 1.142(b) and MPEP § 821.03.

Claim 9 is allowed.

This application is in condition for allowance except for the presence of claims 5, 6, and 11-21, directed to an invention non-elected with traverse. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.
